Profile Summary

- Front-End Developer skilled in **HTML**, **CSS**, **JavaScript**, and **ReactJS**, with experience building responsive and reusable UI components.
- Strong foundations in **JavaScript**, **React.js**, and **Node.js**, with the ability to collaborate effectively across design and backend teams.
- Fast learner with strong problem-solving skills and a consistent focus on improving performance and adopting new technologies.

Technologies

Languages: JavaScript

Tools: VS Code, Git, GitHub

Frameworks & Libraries: React.js, Node.js, Tailwind CSS, Bootstrap

Problem Solving: Solved 50+ problems on LeetCode, focusing on algorithms, data structures, and coding patterns

Experience

AI Language Trainer

Outlier

San Francisco, USA

Sept 2024 - Feb 2025

- Worked on improving large language model behavior using prompt engineering strategies. Helped design and refine test cases that improved system understanding and response accuracy by 40%. Contributed to cross-functional tasks involving AI model training and evaluation..
- Coordinated with cross-functional teams to achieve project milestones across five diverse tasks, leading to a delivery rate increase of 40% while maintaining high standards for communication and collaboration.

Frontend Developer Intern

Cap Corporate AI Solution

Chennai, India

Aug 2025 - Present

- Collaborated with cross-functional teams including backend developers, UI/UX designers, and DevOps engineers to build and enhance BallotDA, a production-level product focused on delivering secure and scalable user experiences.
- Developed and optimized responsive frontend features for BallotDA using modern JavaScript practices, improving UI performance and ensuring seamless integration with backend APIs and deployment pipelines.

Projects

QKart – A Responsive React-based E-commerce

[Vercel-Link](#)

Web App

- Built an end-to-end e-commerce application using **React.js**, with core features like user authentication, shopping cart, and secure checkout flow.
- Designed a responsive UI using **Material UI** and **React Hooks**, ensuring consistent experience across mobile and desktop devices.
- Implemented debounced product search, protected routes via **React Router**, and form validation with dynamic error handling for registration/login.
- Deployed on **vercel**, integrated REST APIs for product data and user actions.

Xcruise

[Vercel-Link](#)

- Designed and developed a dynamic, responsive web interface using semantic HTML and modern CSS features.

- Utilized **CSS Flexbox and Grid** to build scalable, structured layouts adaptable to various screen sizes.
- Implemented interactive UI components using pure HTML and CSS, without relying on JavaScript.
- Applied reusable styling patterns and class-based selectors for clean, maintainable code.

Quiz App

[Project-Link ↗](#)

- Developed an interactive quiz web application using HTML, CSS, and JavaScript with dynamic question rendering.
- Utilized the Document Object Model (DOM) to manipulate and update quiz content in real-time based on user interaction.
- Implemented responsive layout designs using CSS Flexbox and Grid for seamless performance across all screen sizes.
- Ensured smooth user experience through input validation, score tracking.

Achievements

- Served as **College - Head** for one year, successfully leading the organization and execution of multiple high impact events.
- Actively contributed as a member of the CPHD Healthcare Foundation (NGO) for one year, facilitating impactful community service initiatives.

Education

Sagar Institute of Research and Technology Excellence, Bhopal, MP

Expected Graduation: June 2025

Bachelor's of Technology in Computer Science

- GPA: 7.56 (8th Semester)
